

Nine Glangeaud

Professional Profile:

Nine M-C Glangeaud-Freudenthal was trained as a biochemist (Ph.D) and as a psychologist (DESS). She is a Permanent Research Fellow at the French Centre National de la Recherche Scientifique (CNRS): and, since 1992, is working at an Epidemiological Research Unit on Perinatal Health and Women's and Children's Health ([Research Unit INSERM 953](#)). [View Ms. Glangeaud's top 20 papers.](#)

Her two main themes of research are on perinatal mood disorders (PND, Blues, Anxiety and pathways to mental health care) and issues of women and children care at mother-baby units.

She has undertaken several follow-up studies of women's mental health during the perinatal period and had participated as a member of the project management team in the Transcultural Study on Postnatal Depression directed by the late Professor Channi Kumar (TCS-PND Study; 1998-2001). She is one of the founders of the francophone group of the Marcé Society (SMF) and presently is an honorary member of this Society

Since 1999, she is a co-ordinator for the constitution of national data base (more than thousand inclusions) on Mother-Baby joint admissions to a Mother-Baby Units in France and Belgium and Luxembourg and for its analysis. She has results published in French and English.
